Range of content

- 1) Assets and sources of their funding.
- 2) Preliminary analysis of a company's financial statements.
- 3) Working capital management.
- 4) Ratio-based financial analysis of a company.
- 5) Systems and methods for assessing a deteriorating financial condition of a company.
- 6) Evaluation of the structure and cost of capital.
- 7) Leverage effect in company.
- 8) Investment decision-making principles.
- 9) Time value of money calculation as the basis for making financial and investment decisions.
- 10) Valuation methods for businesses.

Didactic methods

Lecture:

1. Lecture using audiovisual means.
2. Own work with literature.
3. Group discussion.
4. Quizizz.

Practical session:

1. Analysis of literature and data sources.
2. Problem solving.
3. Case studies.
4. Discussion.
5. Working with a spreadsheet.
6. Quizizz.

Assessment methods and assessment criteria

Lecture:

1. Observation and evaluation of activity. (U01, U02, K01)
2. Written test. (W01, W02)

The final grade is determined by the sum of points for: tests and activity in class.

Grading scale: 55% = 3.0; 90% = 5.0.

Practical session:

1. Observation and evaluation of activity. (U01, U02, K01)
2. Written test. (W01, W02, U01, U02)
3. Problem solving and case studies. (W01, W02, U01, U02, K01, K02)

The final grade is determined by the sum of points for: tests, project and activity in class.

Grading scale: 55% = 3.0; 95% = 5.0.
